COORDINATED ENTRY

With Coordinated Entry, no door is the wrong door because Adsystech has created a way to make every door the right door.

Adsystech's Coordinated Entry solution gives providers and systems for service/ referrals a platform to collaborate, establishing a common way for families to access and quickly link themselves to the resources they need through defined points of entry. By using a common HMIS system, providers can expect a streamlined service delivery, tracking and evaluation in addition to the standardized, strength-based, culturally appropriate screening and assessment.

√ Access and Awareness
√ Streamlined Application process/ Universal Applications
√ Effective Management and Delivery
√ Referrals

TOOLS

+ Data sharing between organizations assuring unduplicated coordinated delivery of services
+ Common outcome framework for measuring applicant/family gains and the related costs
+ Common data repository for analyzing programs' impact on communities

+ A simplified identifiable process for families to access services.
+ Access point(s) to multiple programs/ services through one process to request services.
+ The ability to match families into appropriate housing and services tailored to their needs.
+ Unduplicated data on the number of homeless families and the needs/barriers of these families that can influence
