EARLY LEARNING

Under the Early Learning Module, there are many programs that are meant to provide children with the developmental building blocks that are most important for a young student's long-term success. Through creating a Public Portal and Exchange sites, Adsystech has given families extended access to Early Learning services within their community (i.e. Headstart, Preschool for all (PFA), Early Headstart, Childcare Assistance).

PUBLIC PORTAL

The Public Portal allows for organizations and agencies to keep their program site and use it as a pre-existing access point to the exchange site while suppling potential and current applicants with program information.

+ Program Information for Applicants
+ Shopping Cart capabilities
+ Access to Exchange site

EXCHANGE SITE

The Exchange Site, more formally known as the Coordinated Service Exchange, is where families/applicants are directed once they are ready to apply for selected sites/ programs. Shopping cart contents are passed onto the Exchange Site where families/ applicants are prompted to Register or Log In.

+ Account Set-up (First Time Users)
+ Program Application
+ Case Management (Enrollment, Case Plan, Case Notes, Verifications of Documents, Household History, etc)

BENEFITS

+ Single point for accessing all applicant/family utilization of Early Learning programs
+ Enhanced collaboration among service providers in addressing family/applicant needs
+ Greatly improved efficiency in searched program results, site availability and application/enrollment process
+ Automatic placement based on eligibility

Headstart ERSEA

+ Eligibility
+ Enrollment
+ Recruitment
+ Attendance
+ Selection
