## HMIS

Homeless Management Information Systems (HMIS) is a system created to collect client-level data and data concerning the provision of housing and services. Adsystem's software solution uses applicant data to measure outcomes in addition to tracking and managing the effective delivery of housing and services to individuals/families at risk of or are experiencing homelessness.

**Through the HMIS module, a Continuum of Care (CoC) can utilize Adsystem's software solution for a number of homelessness programs (including but not limited to):**

- + Emergency Shelter Programs
- + Transitional Housing
- + Permanent Housing
- + Safe Haven Facilities

### PROGRAM MANAGEMENT TOOLS

- + Correct billing of resources to funding sources
- + Configurable program eligibility
- + Tracking of program effectiveness through Outcome Measurement
- + Generate APR, ESG, CDGB, Housing Inventory Chart, Universal Data Elements, Program Specific Data Element reports
- + Full automation with AHAR XLM exchange for submission of reports to HUD

The Adsystem HMIS Software Solution is fully secure and HUD certified with the ability to interface with locally funded CoC policies. Management reports meeting HUD reporting requirements are also capable of accessing and interrogating all HMIS content through the AdHoc reporting feature. Users, through AdHoc Reporting, can utilize prebuilt data views that cover all elements of the HUD HMIS data standards. In addition to these previously noted features, Adsystem's HMIS software solution also offers:

- + Unduplicated client data entry
- + Reporting and program management tools
- + Improved service accuracy
- + Internal and external referrals with 211 interfacing capabilities; Organizations gain the ability to set up guidelines for services and connect billing and reporting of referenced events.
- + Integrated Mapping tools provides ease of access to routing eligible applicants to available resources and referrals
- + Communication tools notify internal and external services on pending service tasks and provide confirmation once completed.
- + Available and continuously updated mandated HUD homelessness reports (APR, AHAR, QPR, etc)
- + Mobile capabilities and compatibility across multiple operating systems allow for field counts and outreach work.
